CASIO® ORDER ENTRY SYSTEM

WIRELESS WAITRESSING SOLUTION
Improves profitability, efficiency and customer service

The QT-6000 series links to Order Entry System (OES), a wireless ordering terminal that import profibality, efficiency and customer service.

By allowing your staff to submit orders directly from the table, they are faster more attentive and less likely to miss orders, giving better customer service and the value of orders.

The OES is a unique device, developed especially for Pub, Cafe, Food Court and especially **Open Air** F&B outlet.

It utilises a unique 430MHz range wireless communication, which is reliable and less confliction with other radio wave. The OES can operate for 30 days with the AAA dry battery and 180 metres away from the base station.

With 160cm drop resistance and IP54 dust/splash proof, it can endures tough environment.

It is small and light weight for easy handling with the weight less than 250g(include battery).

ORCA V6 MULTI-CHAIN STORE MANAGEMENT SYSTEM

The preferred working solution for Franchisers and Multi-Kiosks Owner

Orca V6 is developed exclusively for real-time multi-location management using FTP. FTP is cheap, fast and reliable. It allows 2-ways communication with auto push/pull data. As such, you can monitor your outlet sales and manage its stock inventory at the same time.

Features :
❖ Daily / Periodic Sales & Summary Report
❖ Standard ECR Reports on PC
❖ Multi-Location Remote Sales Polling
❖ Multi-ECR Programming on PC
❖ Optional link to F & B Stock / Retail Stock
❖ Custom Dept Sales Tax Submission Report
❖ Reports can be exported to many formats (Excel, Lotus, etc)

QT-6600
..15" TFT LCD Touch screen
..Built-in Customer Display
.. best for Retailers & Multi-Chain Stores

COMPACT & STURDY DESIGN
Looks good in any environment

The QT-6100 features a large bright, 12.1" TFT-LCD touch screen with adjustable angle and 400 candela brightness for optimum viewing in any condition, including bright outdoor.

The terminal base is made of sturdy, solid metal die-cast construction.

It is small enough to fit into tight spaces and its unique design allows wall and shelf mounting.

SIMPLIFY & SPEED UP YOUR SALES
For quick and smoother operations

The QT-6000 series's intuitive user interface features a clear, concise visual screen layout which incorporate graphical icons as well as one-touch operation for hot items. This makes operation quick and easy at the point of sale, allowing you to maximise sales in peak period.

The QT-6000 series can also be programmed to give sales prompts, such as additional sales, side orders or details of cooking styles to ensure your customers get their orders correctly prepared to their preferences!
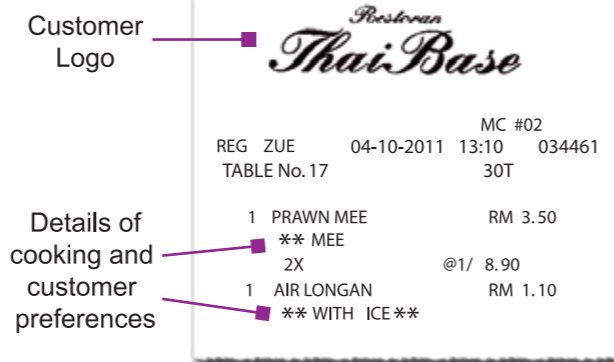

EXPERT FLOOR MANAGEMENT
Accomodate Customers Fast & Efficient

With up to three separate full screen table layouts, 15 half screen layouts and an open tab/check screen, you can see your restaurant at a glance.

The status of each table will be displayed on the table layout, allowing easy identification of occupied tables, booked tables, tables with split bills and tables that have received their bill.

So, when a customer comes into your restaurant without reservation, you will be able to immediately decide where and when to accomodate them.

QT-6000 Series
for Retail & F&B business

PERSONALISED LOG-ON DALLAS KEY
Easy & Secure System Access for Staff

Staff can log-on to the QT-6000 series by use of a personalised Dallas Key. When the Dallas key is inserted, the operator is immediately signed on to that terminal and when the key is removed, they are logged-off automatically.

Dallas keys can be configured to provide the authority for price changes. For example, only the manager Dallas key can allow happy hour pricing to take effect.

The QT-6000 series supports floating operators, so staff can an start order at one terminal and complete it at another terminal. A screen saver with advertising messages can be displayed when no operator is logged onto the terminal.

PRINT AND DISPLAY WHAT YOU NEED
Print & Display Useful Information Direct to Staff

The QT-6000 series allows you to print and display useful instructions for the kitchen or bar staff, without changing the customer receipt.

For example, if your customer orders a cocktail, the recipe can automatically print at the bar with the order making it easy for the bar staff to prepare.

For Chinese restaurant, the kitchen order can be printed in Chinese character for easy reference.

The QT-6000 series is designed to easily adapt to and enhance your current operational methods, increasing productivity.

BARCODE SCAN WITH STOCK CONTROL
To Accomodate Restaurant Handling Barcode Items

The QT-6000 series PanEU Scanning Solution offers 60,000 scanning PLU Code with stock control, 7-shift PLU for multiple prices, supports in-store barcode such as embedded price and weight, mix and match and Not-Found-PLU features.

You can directly connect an 'online-counter scale' to the QT-6000 for operations such as weighing fruits, vegetables and tit-bits that charge products by weigh.

EASY NETWORKING AND COMMUNICATIONS
Support Ethernet, TCP/IP, WLAN and FTP

Terminals can be configured easily to run on Ethernet, TCP/IP, WLAN or FTP. When the terminals are networked, a comprehensive printer sharing function is enabled, allowing orders to be printed at a variety of places from each terminal. Networking the terminals also eliminates duplication of work, as changes made on one machine can be automatically sent to the other machines.

For added security, QT-6000 series networked terminals support key stroke monitoring, allowing you to monitor the key strokes an operator is making on a terminal, whilst watching the items they sell to ensure they are the same.

FAIL SAFE DATA BACKUP FOR YOUR PEACE OF MIND
Compact Flash Card for Data Savings and Uploading

The QT-6000 series can be configured to automatically back-up all program information to Compact Flash Card (CF).

You can minimise downtime and eliminates worry on reprogramming the terminal as they can be restored easily using the CF card.

Sales reports can also be backup to CF card, allowing them to be easily transferred to any computer. It can also be sent to FTP server for headquater/main office download.

STOCK AND STAFF REPORTS ANALYSIS
To Always Keep in Touch of Restaurant

With the QT-6000 series's comprehensive item and group reporting capabilities, you will always be aware of your key selling items and lines. End of day cashing-up reports can be conducted per terminal and overall, allowing you to immediately see your daily turn-over.

Time and attendance reports allow you to see staff member work hours compared to sales turnover ensuring staff are working the correct hours.

Clerk reports help you to monitor staff performance against a variety of options including the number of voids / no sales per operator and promotion sales, allowing you to reward your best sales people.

HOTEL INTERFACE MANAGEMENT
Ideal Link For Hotel System And Restaurants/Bars

Allows hotel front system to link directly to the restaurants and bars, minimising profit loss cause by miss bill of foods and drinks served to hotel guests.

The system verifies up to four folio per room, with individual messages for each folio. It will also verify the name before room charge and each transactions are capped to credit limit. It is also equipped with tax tables.
